

# Viikkoraportti 1

I spent about 4 hours for preparing this Week 1 tasks.

- **Mitä olen tehnyt tällä viikolla?**

This week I chose the problems, on which I will work till the end of the course.

For this purpose I have been searching on the net about different tree structures and chose 4 from most popular ones, which are widely used.

- **Miten ohjelma on edistynyt?**

I have not yet started to do it.

- **Mitä opin tällä viikolla / tänään?**

I found information for very many variants of trees on the net, designed for different purposes. I was surprised to see how important are these data structures.

- **Mikä jäi epäselväksi tai tuottanut vaikeuksia?**

Since I have not plan very well my time this week, it was not enough to reach deeper understanding of these data structures and most of all - to choose the algorithms, which I will apply next weeks.

- **Mitä teen seuraavaksi?**

I will choose the algorithms and apply them in Java.
